

Inoculants from Philom Bios

JumpStart®

JumpStart is the phosphate inoculant that unlocks bound phosphate so your crops can make better use of soil and fertilizer phosphate. As a result, JumpStart maximizes your phosphate fertility investment and your yields.

JumpStart is registered for use on canola, wheat, mustard, peas, lentils, chickpeas, dry beans, alfalfa and sweetclover.

Next Generation TagTeam® – Pea/Lentil

Next Generation TagTeam offers the best yields and best value in pea and lentil inoculants guaranteed. It has a new patent pending rhizobia strain, new carriers and new formulation ingredients along with the phosphate solubilizer to create the most complete pulse inoculant. *MultiAction*® TagTeam for pea and lentil is available in both peat and granular formulations.

Ask about the Next Generation TagTeam Pea/Lentil Value Guarantee*.

TagTeam® – Chickpea

MultiAction TagTeam for chickpea is now available in both peat and granular formulations.

TagTeam® – Soybean

MultiAction TagTeam for soybean is now available in both peat and granular formulations.

TagTeam® – Dry bean and Alfalfa/Sweetclover

MultiAction TagTeam is also available in a peat formulation for dry bean, alfalfa and sweetclover.

N-Prove® – Pea/Lentil

Next Generation N-Prove peat for pea and lentil is now available with the same patent pending rhizobia strain as Next Generation TagTeam.

N-Prove is also available in liquid formulation for use on peas and lentils.
